

IF – for 1, 2 or more extraction points

- Very low noise.
- Suitable for one or several extraction points.
- Different fans are possible depending on the application.
- The very large filter capacity is achieved by a multistage filter combination.
- Range of different air flow rates.
- The filtered air can be recirculated in the room – this dispenses with installation of waste air ducts, minimises costs and increases health safety and environmental protection.
- Ideal for the rapid equipping of existing workplaces.

Applications:

- Marking and engraving lasers
- Cutting and welding lasers
- Soldering and welding fumes
- Fine particles and fumes
- Solvents and adhesive vapours
- Oil mist, emulsion mist
